Bournemouth, UK | 07729392274 | ryan.kelly4553@gmail.com

Portfolio: <https://rhyze.co.uk> | GitHub: <https://github.com/whos-ryan> | LinkedIn: <https://www.linkedin.com/in/ryan-kelly-841201283/>

Education

Bournemouth University — BSc (Hons), Computer Science
Sep 2025 - Present

Buckinghamshire New University — BSc (Hons), Computer Science
Sep 2023 - Jun 2024

Projects

Notes App | Next.js, TypeScript | Vercel + GitHub

Live: <https://notes-seven-snowy.vercel.app> | Repo: <https://github.com/whos-ryan/notes>

- Built and deployed a notes web application with a TypeScript-based Next.js codebase.
- Shipped the project through a GitHub workflow and Vercel deployment.

Assignment Tracker | React, TypeScript, CSS | Vercel

Live: <https://app-tracker-black.vercel.app>

- Built a web application for students to track grades across individual modules.
- Implemented a typed React front end and responsive UI for day-to-day use.

Flow Period Tracker | Vue.js | GitHub

Repo: <https://github.com/whos-ryan/flow-period-tracker>

- Built a period-tracking web app focused on clear, date-based tracking workflows.
- Developed a responsive interface for logging and reviewing cycle entries.

Marcus Aurelius AI Chatbot (Team Project) | University Collaboration | Vercel

Live: <https://marcusaurelius-client.vercel.app>

- Delivered a collaborative software engineering project within a university team.
- Contributed to client-side implementation and deployment support.

Experience

E+I Engineering / Vertiv (EMS Department) — Summer Work Experience
Present

- Worked with EcoStruxure systems, implementing control logic from structured text and ladder diagram workflows.
- Used Power SCADA to monitor and support live data centre operations.
- Performed on-site technical work in data centre environments for blue-chip clients.
- Identified and fixed HMI issues at data centre sites, then wrote technical documentation to support repeatable fixes.

Bar Staff / Shift Lead — The Antelope / The Hourglass / Belle Vue
Apr 2024 - Aug 2025

- Built strong communication, teamwork, and operational reliability in fast-paced service environments.

Technical Skills

- **Languages:** TypeScript, JavaScript, C#, Python, Java, SQL, HTML, CSS
- **Frameworks/Libraries:** React, Next.js, Vue.js, Node.js
- **Databases:** PostgreSQL, MongoDB
- **Tools:** Git, VS Code, Visual Studio
- **Platforms/Systems:** Vercel, Railway, EcoStruxure, Power SCADA
